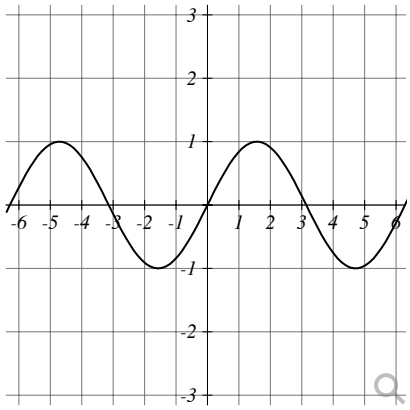
8.1 Homework

joel kalala

Question 1

1/1 pt 4

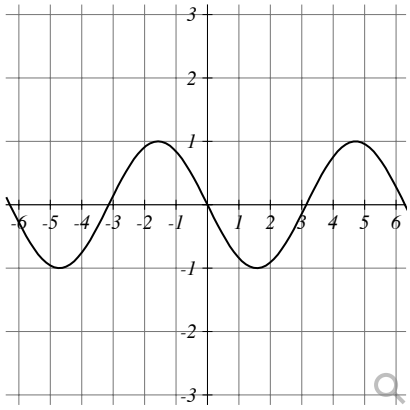


The graph above is a graph of what function?

- (selected) y = sin(x)
- y = cos(x)

Question 2

1/1 pt 3



The graph above is a graph of what function?

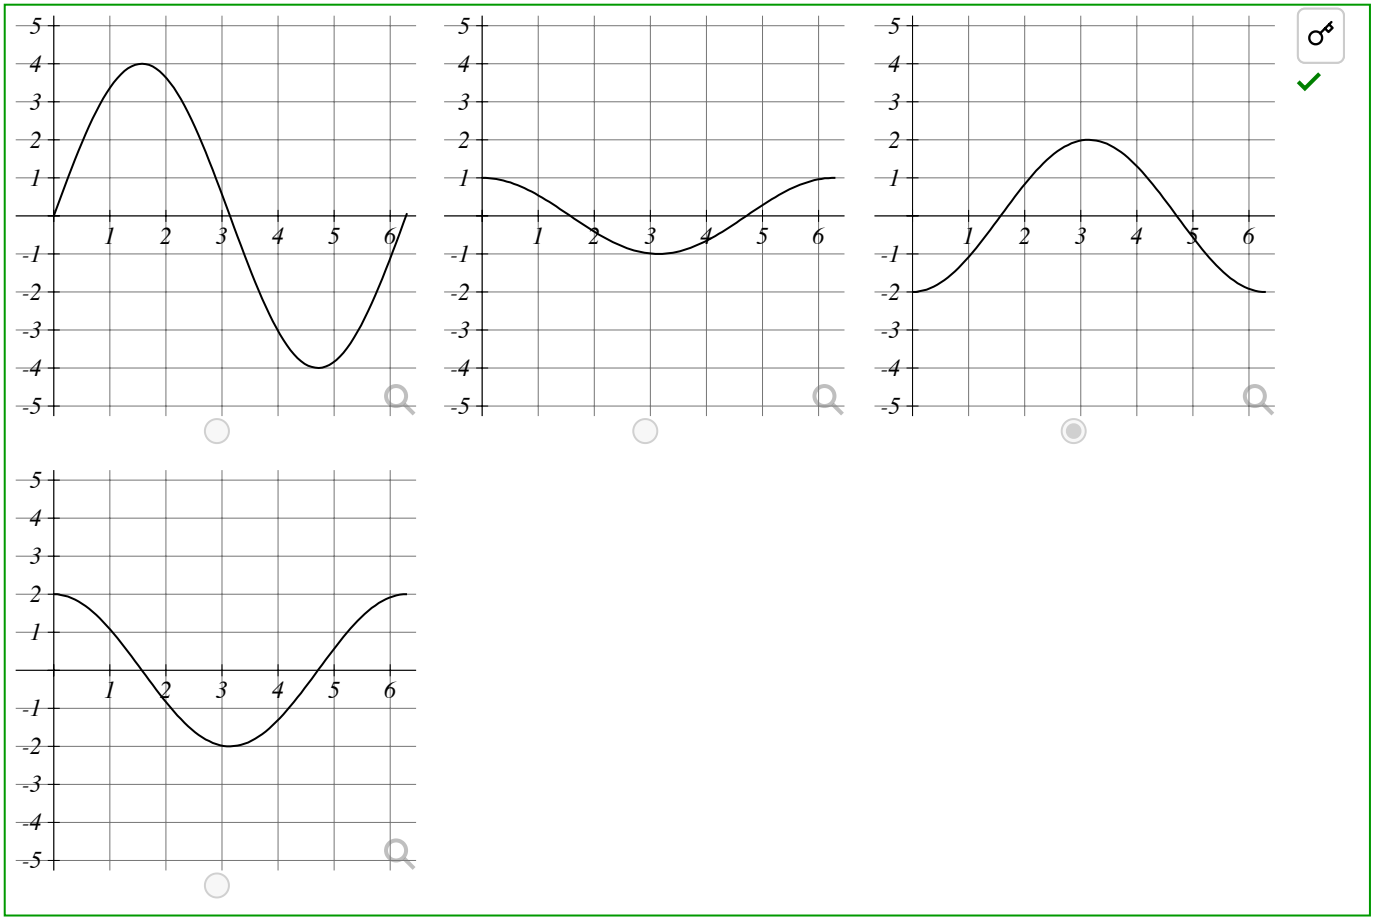
- y = -cos(x)
- (selected) y = -sin(x)
- y = cos(x)
- y = sin(x)

Question 3

1/1 pt 4

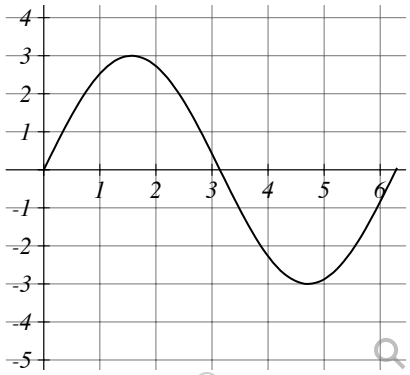
Which of the following graphs is the correct plot of y = 2cos(x)?

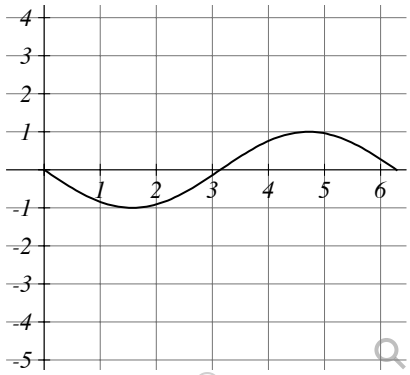
Which of the following graphs is the correct plot of $y = -2\cos(x)$?

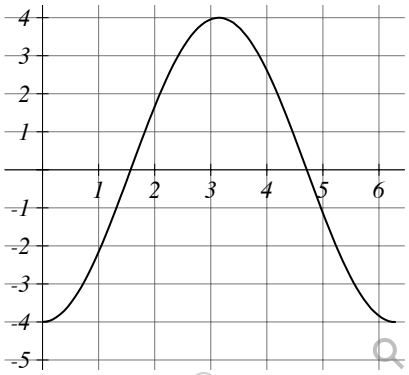


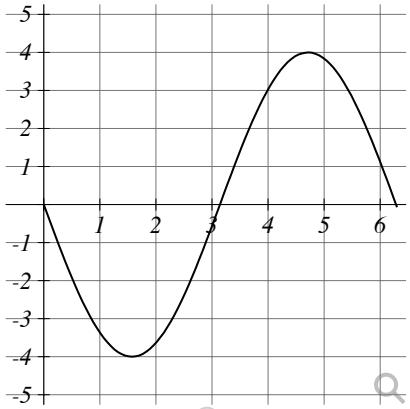
✓ **Question 4** 1/1 pt 2

Which of the following graphs is the correct plot of $y = -4\sin(x)$?





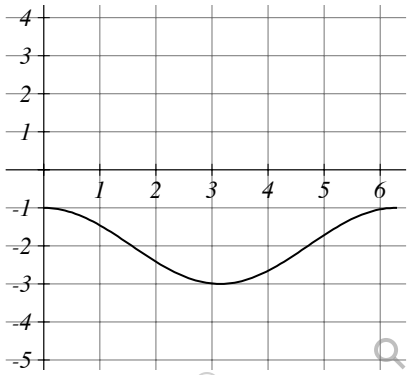


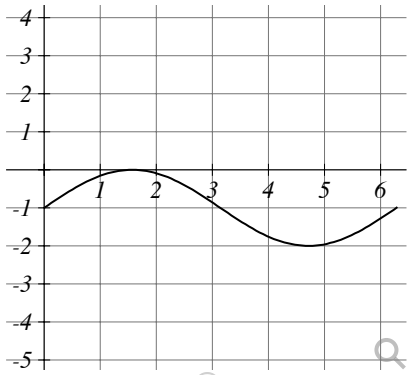


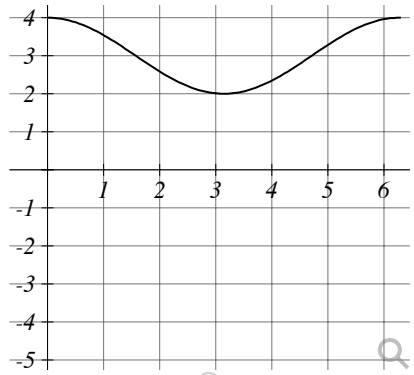
Question 5

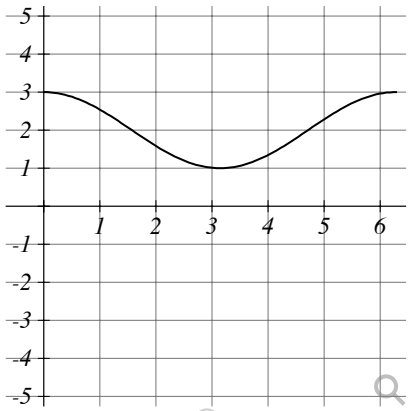
1/1 pt 3

Which of the following graphs is the correct plot of $g(x) = \cos(x) + 2$?





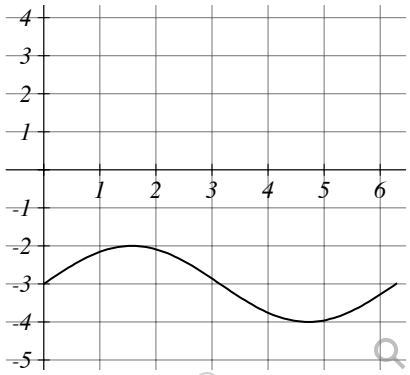


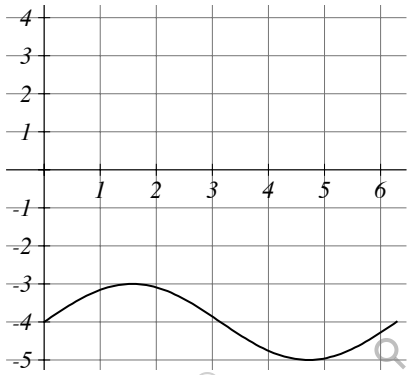


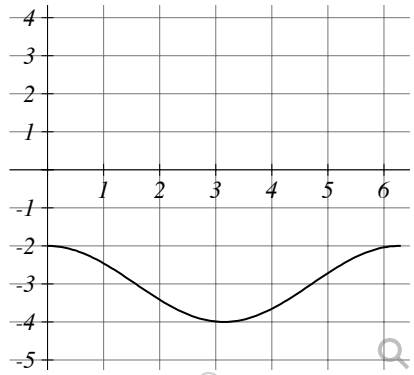
Question 6

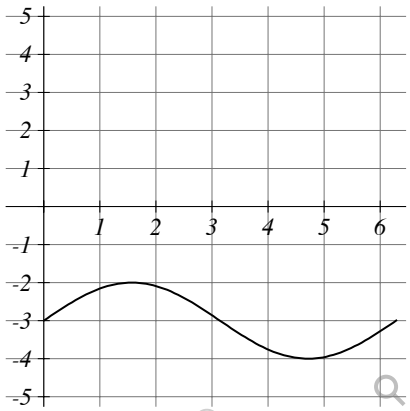
1/1 pt 2

Which of the following graphs is the correct plot of $h(x) = \sin(x) - 4$?





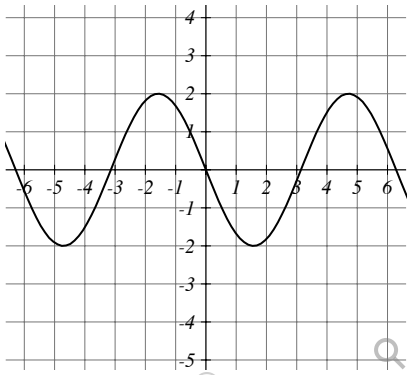


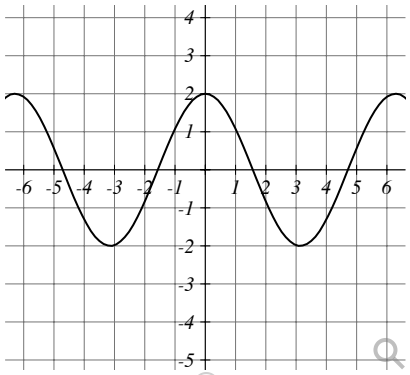


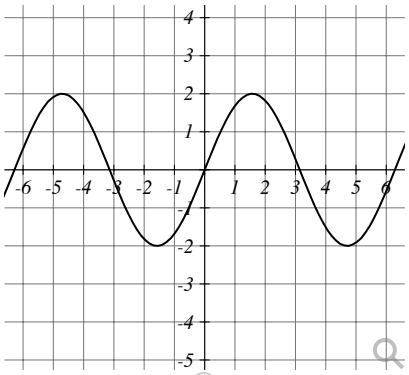
Question 7

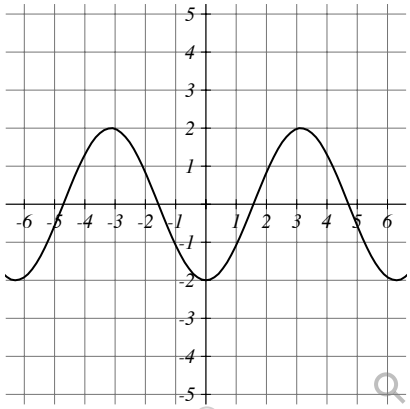
1/1 pt 3

Which of the following graphs is the correct plot of $y = 2\cos(x)$?





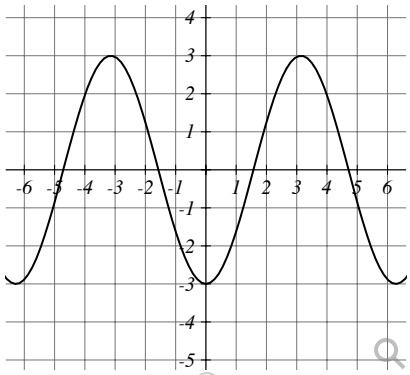


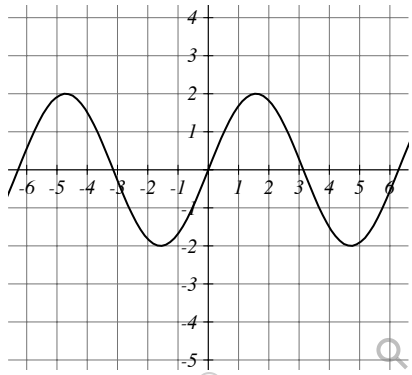


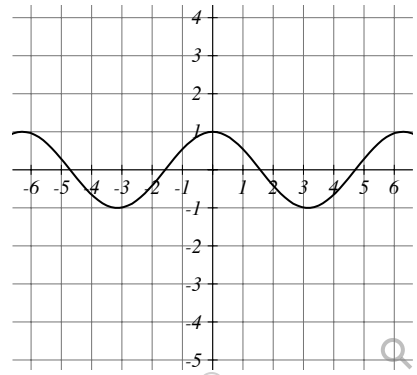
Question 8

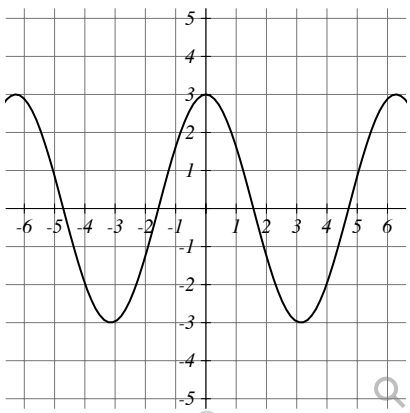
1/1 pt 1

Which of the following graphs is the correct plot of $y = -3\cos(x)$?





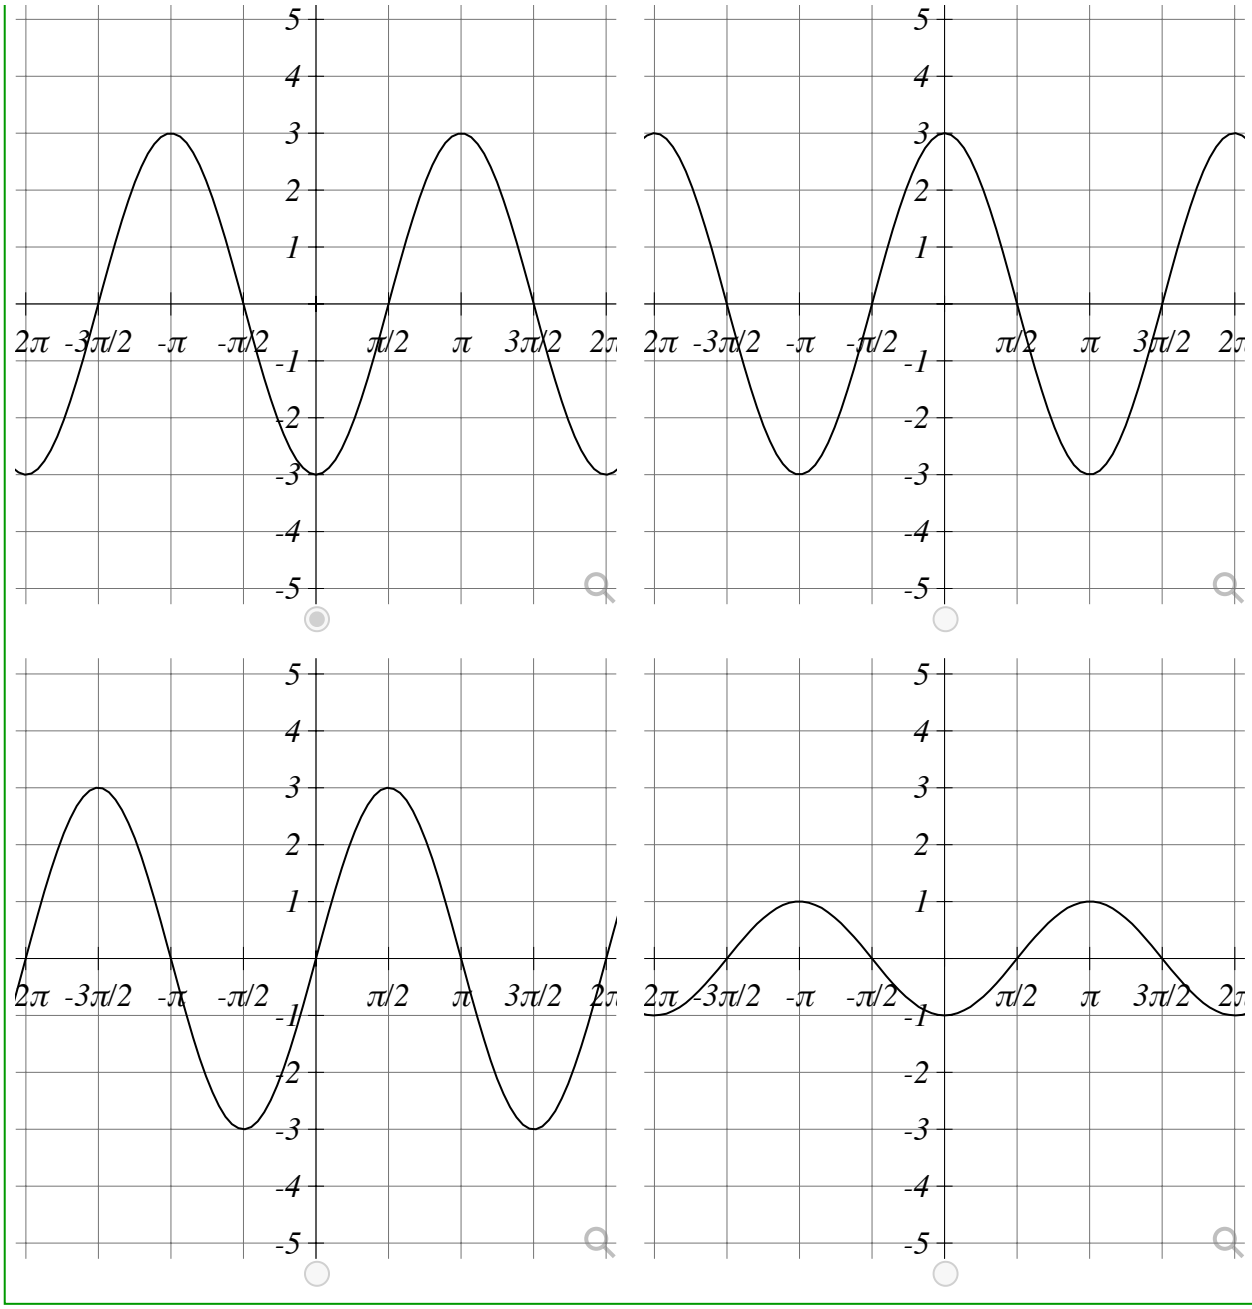




Question 9

1/1 pt 4

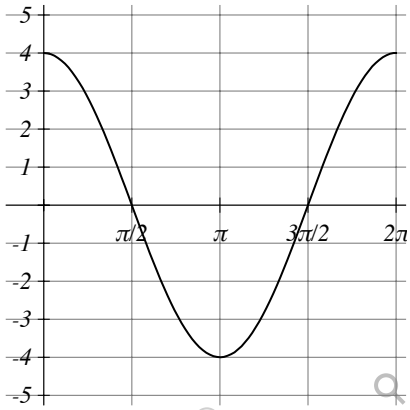
Which of the following graphs is the correct plot of $y = -3\cos(x)$?

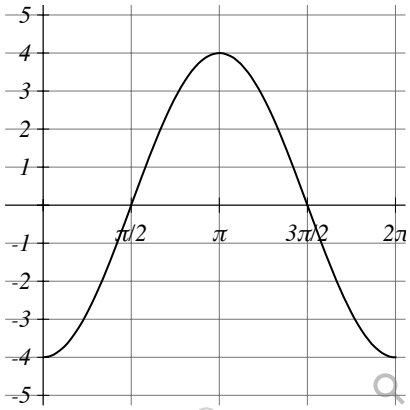


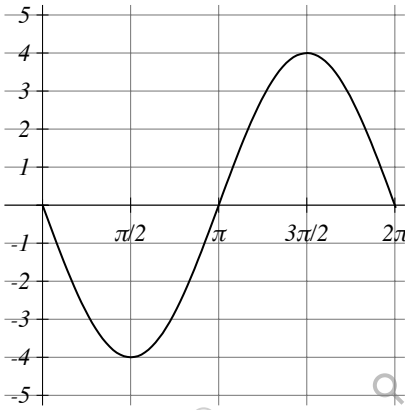
Question 10

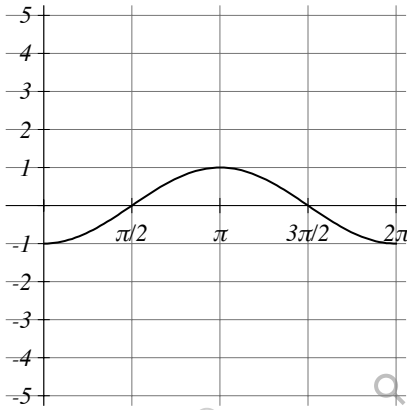
1/1 pt 3

Which of the following graphs is the correct plot of $y = 4\cos(x)$?





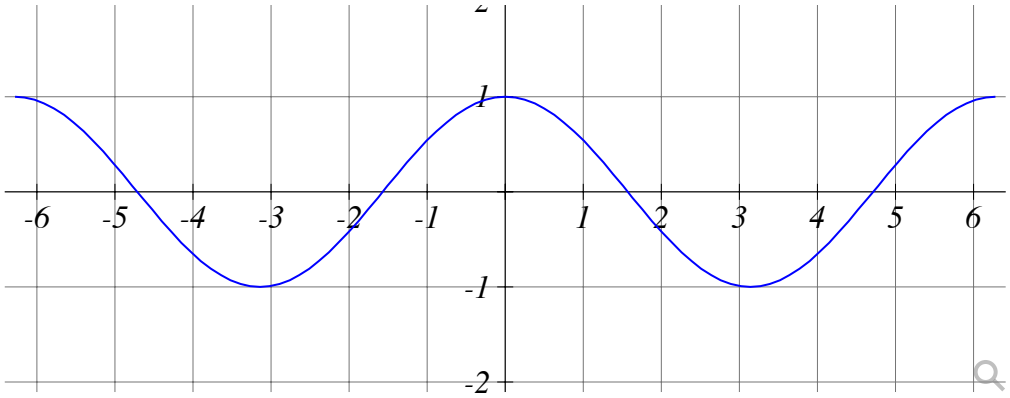




Question 11

0/1 pt 3

Give the formula for the function which would have graph shown below.



Leave your answer in exact form; if necessary, type **pi** for π.

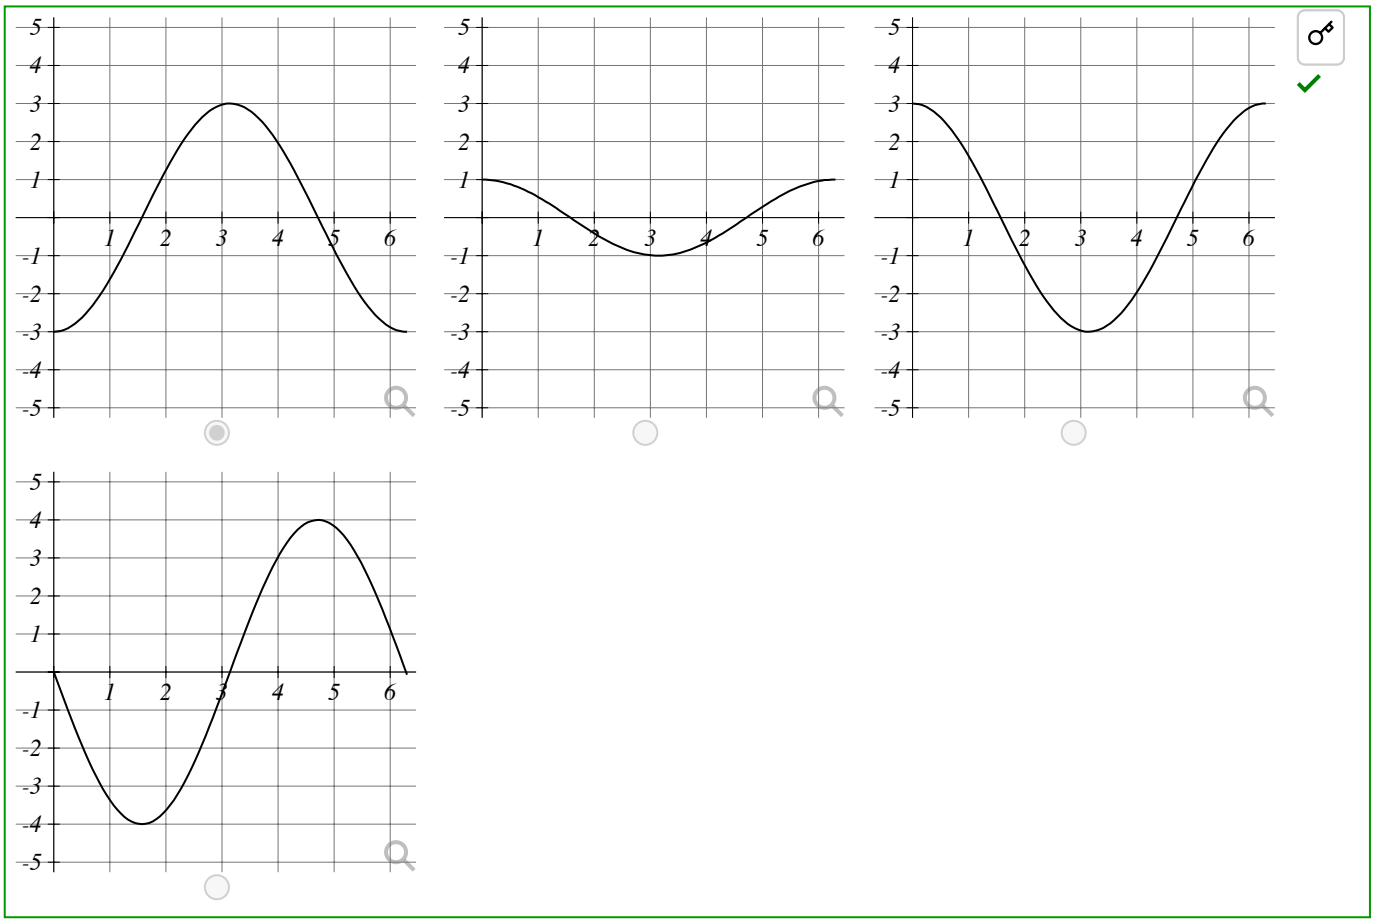
$y =$ $\sin\left(\pi + \frac{\pi}{4}x\right)$

Question Help: Video

Question 12

1/1 pt 1

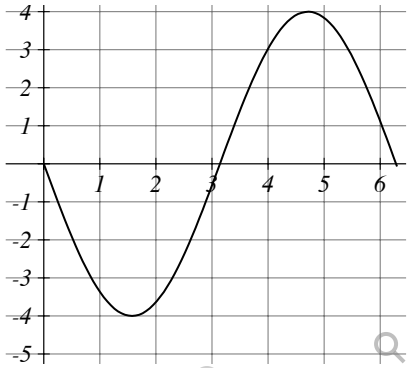
Which of the following graphs is the correct plot of $y = -3\cos(x)$?

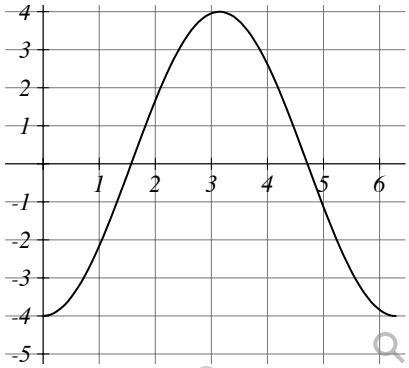


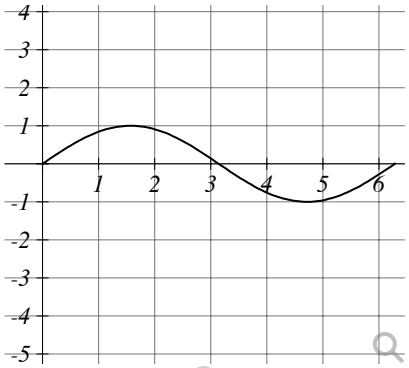
Question 13

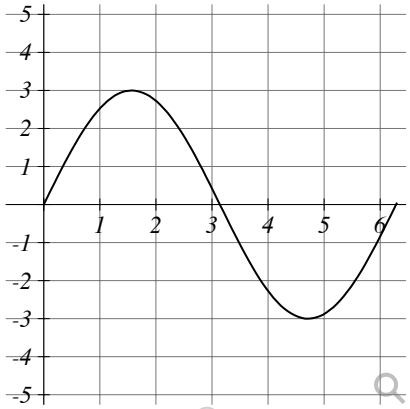
1/1 pt 4

Which of the following graphs is the correct plot of `y=-4sin(x)`?









Question 14

1/1 pt 4

For `y=-3 cos(x) + 9 `,

its amplitude is 3

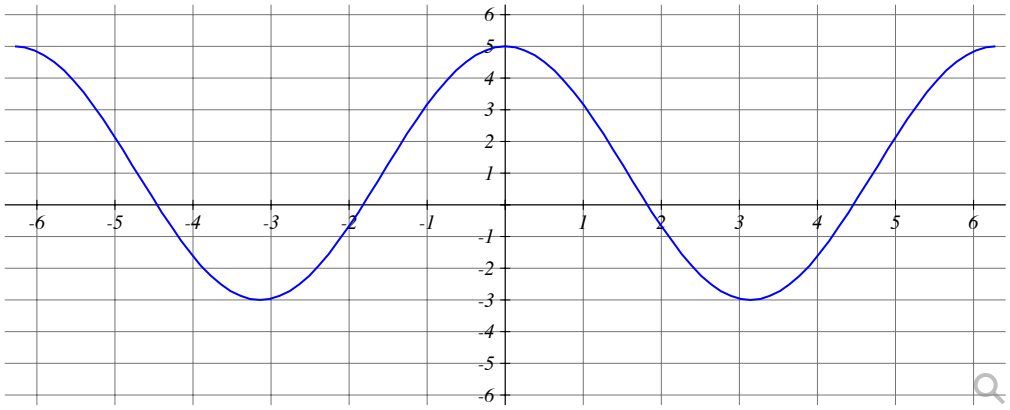
its midline is y = 9

Question Help: Worked Example 1

Question 15

0/1 pt 4

Find a function of the form `y = A\sin(x)+D` or `y = A\cos(x)+D` whose graph matches the function shown below:



Leave your answer in exact form; if necessary, type **pi** for `pi`.

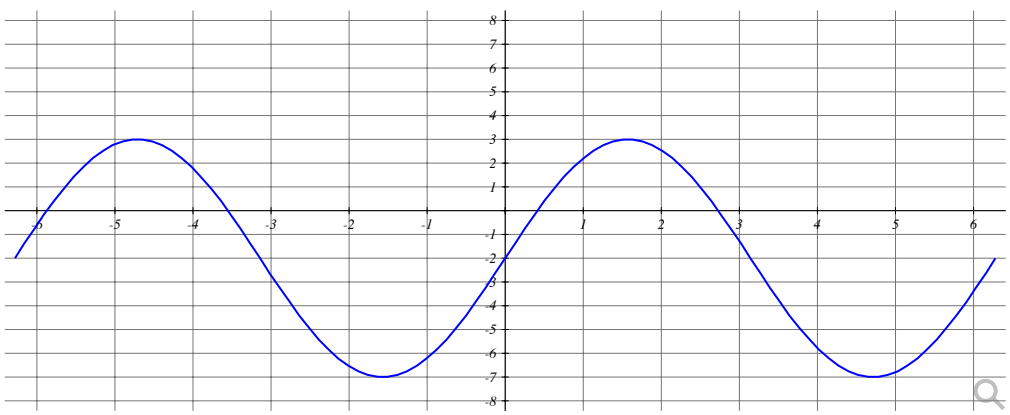
`y = ` $3\cos\left(\frac{\pi}{3}x\right)+2$

Question Help: Video 1 Video 2

Question 16

0/1 pt 5

Find a function of the form `y = A\sin(x)+D` or `y = A\cos(x)+D` whose graph matches the function shown below:



Leave your answer in exact form; if necessary, type **pi** for `pi`.

`y = `

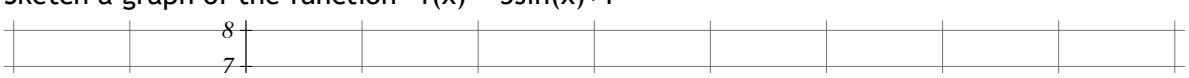
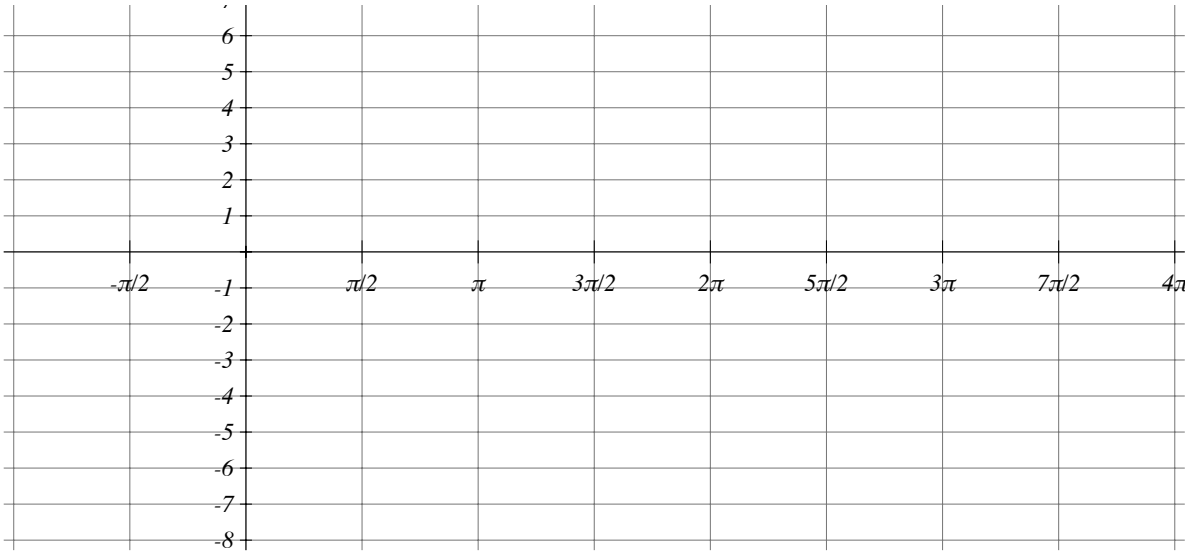
Question 17

0/1 pt 5

Sketch a graph of the function `f(x) = 3sin(x)+1`

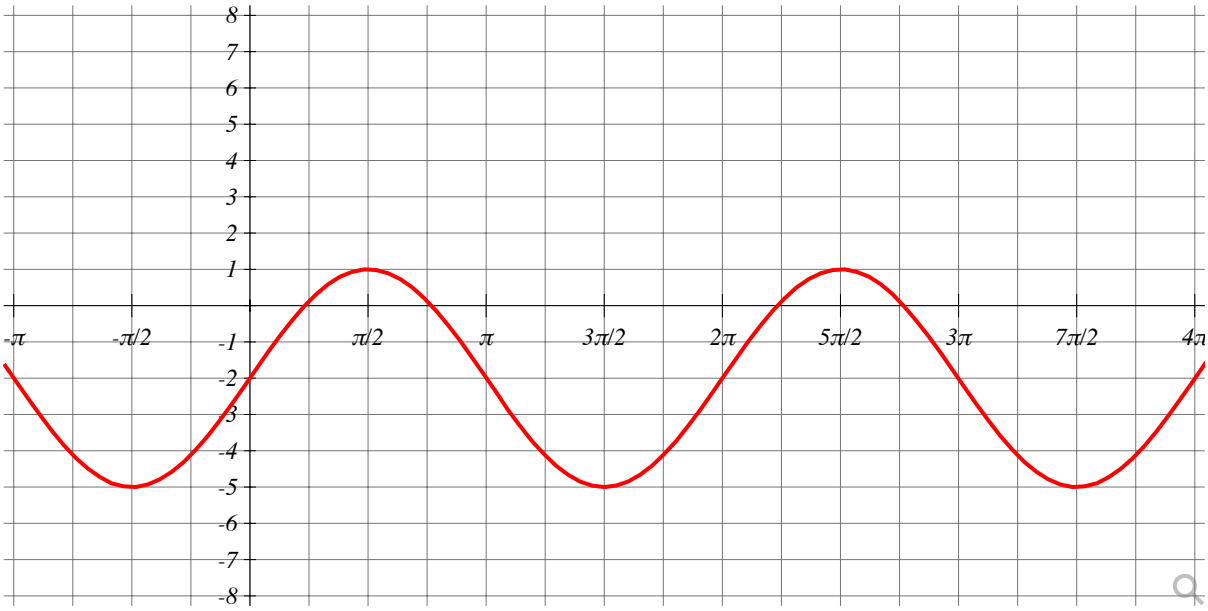




Question 18

0/1 pt 5

Consider the graph below.



Write an equation that matches the function plotted below. Use "x" for your variable.

y =
